Ideation Phase

Brainstorm & Idea Prioritization

Date: 30 September 2026

Team ID: SWTID-2026-1259

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Maximum Marks: 4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Statement: The current IT procurement process lacks efficiency and automation, causing delays and manual overhead in standard laptop orders. Configuration is prone to oversight or delay, leading to user frustration and inefficient resource allocation within the IT department.

Step-2: Brainstorm, Idea Listing and Grouping

Idea	Description
Automated Flow Designer Workflow	Automatically generate a Catalog Task after approval of a standard laptop request.
Automatic Hardware Assignment	Assign the generated task directly to the Hardware group for configuration.
Standardized Task Description	Automatically update the short description and description to indicate that the laptop needs configuration.
Approval-Based Task Creation	Use the Approved status as the condition for creating the configuration task.
Service Catalog Integration	Connect the Standard Laptop service catalog item with the created Flow.
Reduce Manual Intervention	Replace repetitive manual task creation and assignment with workflow automation.

Idea Grouping: Automation — Flow Designer Workflow, Approval-Based Task Creation; Task Management — Hardware Assignment, Standardized Task Description; Service Integration — Service Catalog Integration; Efficiency — Reduce Manual Intervention.

Step-3: Idea Prioritization

Priority	Idea	Reason
1	Automated Flow Designer Workflow	Directly addresses the project objective of automating procurement and configuration.
2	Automatic Hardware Assignment	Ensures configuration tasks are assigned to the Hardware team promptly.
3	Approval-Based Task Creation	Ensures the task is created after the service request is approved.
4	Service Catalog Integration	Connects the automation to the Standard Laptop ordering process.
5	Standardized Task Description	Improves clarity of the generated catalog task.
6	Reduce Manual Intervention	Supports the overall goal of reducing manual overhead and potential errors.

Selected Concept: Implement a ServiceNow Flow Designer workflow for Standard Laptop requests that, after approval, creates a Catalog Task, updates its description, and assigns it to the Hardware group for configuration.
