Functional & Performance Testing Template

Functional & Performance Testing

Date: 30 September 2026

Team ID: SWTID-2026-1259

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Maximum Marks: _____

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Standard laptop request initiation	Open ServiceNow → Service Catalog → Hardware → Standard Laptop → Order Now.	Standard Laptop request is created successfully.	Not provided in source	Not provided
FT-02	Approval and flow trigger	Open the request, go to Approvers, and approve the request. Verify the Flow Designer trigger runs for the Service Catalog request.	After approval, the configured flow is triggered.	Not provided in source	Not provided
FT-03	Catalog task creation	Open the Requested Item and inspect the Catalog Tasks section after the flow executes.	A Catalog Task is created with short description “Laptop need to Configured”.	Not provided in source	Not provided
FT-04	Task assignment to Hardware	Inspect the created Catalog Task and verify the Assignment group field.	The task is assigned to the “Hardware” group and the description is “Laptop need to Configured”.	Not provided in source	Not provided
PT-01	Flow execution / task creation performance	Submit and approve a Standard Laptop request and observe the time until the Catalog Task is created.	Task should be created promptly after the approved request; exact target time is not specified in the source.	Not provided in source	Not provided
PT-02	Repeated standard laptop requests	Place multiple Standard Laptop requests and verify that the configured flow handles each approved request.	Each approved request should generate the corresponding Catalog Task and assignment.	Not provided in source	Not provided
PT-03	Workflow reliability	Repeat the request → approval → Requested Item → Catalog Task verification flow.	The workflow should complete without manual intervention or workflow failure.	Not provided in source	Not provided
