Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	

Project Overview

Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Project Description	Automate standard laptop procurement and configuration in ServiceNow using Flow Designer. After a Service Catalog request is approved, the flow creates a catalog task and assigns it to the Hardware team.
Project Version	Not specified in the source project document
Testing Period	30 September 2026 (testing completion date to be confirmed)

Testing Scope

Verify flow configuration and activation, assignment to the Standard Laptop catalog item, request submission and approval, catalog task creation, task description, and Hardware assignment. Include a negative check for an unapproved request. Actual outcomes must be entered after running each test.

Testing Environment

URL / Location	ServiceNow instance (URL not provided)	**Credentials**	Use authorized project/test credentials; do not include passwords in this document.

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Flow configuration	1. Open ServiceNow and launch Flow Designer. 2. Open the “Standard laptop task” flow. 3. Review Application, Run as, and trigger settings.	Application is Global; Run as is System user; trigger is Service Catalog.	Pending verification	Pending
TC-002	Catalog task field configuration	1. Open the flow’s Create Catalog Task action. 2. Check Requested Item Record and the configured fields.	The action uses the Requested Item Record; short description and description are “Laptop need to Configured”; Assignment group is “Hardware”; Approval is “Approved”.	Pending verification	Pending
TC-003	Flow activation	1. Save the flow. 2. Activate the flow. 3. Reopen it and check its status.	The flow is saved and active.	Pending verification	Pending
TC-004	Flow assigned to Standard Laptop	1. Open Maintain Items. 2. Find the Standard Laptop catalog item. 3. Open Process engine and inspect the assigned flow.	The “Standard laptop task” flow is assigned to the Standard Laptop catalog item.	Pending verification	Pending
TC-005	Submit a Standard Laptop request	1. Open Service Catalog. 2. Select Hardware > Standard Laptop. 3. Click Order Now and note the request number.	A Standard Laptop request is submitted and an order/request record is available.	Pending verification	Pending
TC-006	Approve the service request	1. Open the request record. 2. Go to the Approvers section. 3. Approve the request.	The request approval is recorded as approved.	Pending verification	Pending
TC-007	Generated catalog task	1. Open the Requested Item record. 2. Scroll to Catalog Tasks. 3. Open the generated task.	A catalog task is generated with short description “Laptop need to Configured”.	Pending verification	Pending
TC-008	Hardware assignment	1. Open the generated catalog task. 2. Review the Assignment group field.	The task is assigned to the “Hardware” group.	Pending verification	Pending
TC-009	Negative scenario: request not approved	1. Submit a test Standard Laptop request in an approved test environment. 2. Leave it pending or reject it. 3. Check whether the workflow creates/updates a task.	Verify the actual behavior against the intended approval process; record whether an unapproved request incorrectly produces an approved task.	Pending verification	Pending

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	No issue recorded yet; enter a description if a defect is found.	Record the request/task number and repeat the steps that caused the issue.	To be assessed	Open / Not yet assessed	Add screenshot and notes

Sign-off

Tester Name	To be completed	**Date of Test Completion**	To be completed	**Signature**	To be completed

Notes: Test cases and expected results are based on the provided project document. Actual results, pass/fail status, screenshots, tester details, and sign-off are intentionally left for the team to complete after testing.
