Project Development Phase

Project Implementation Report

Date	30 September 2026
Team ID	SWTID-2026-1259
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	10 Marks

Project Implementation:

S.No.	Parameter	Values	Screenshot
1	Problem Statement	The IT procurement process lacks efficiency and automation, causing delays and manual overhead in standard laptop orders. Configuration can be overlooked or delayed, affecting users and IT resource allocation.	To be attached
2	User Story	As an IT procurement team member, I want standard laptop orders to automatically generate and assign configuration tasks to the Hardware team, so laptops are configured promptly with less manual intervention.	To be attached
3	Project Objective	Use ServiceNow Flow Designer to automate standard laptop procurement and configuration; provide timely configuration, reduce manual errors, optimise task allocation, and improve IT procurement efficiency.	To be attached
4	Implementation Milestones	M1 – Create “Standard laptop task” Flow to create a Catalog Task after approval and assign it to Hardware. M2 – Assign the Flow to the “Standard Laptop” service catalog item through Maintain Items/Process Engine. M3 – Place the order, approve it, and verify the Catalog Task status, short description, and assigned group.	To be attached
5	Conclusion	The automated ServiceNow workflow reduces manual overhead, supports timely laptop configuration, improves resource allocation, minimises user wait time, and provides a more efficient procurement experience.	To be attached
